## DETAILED ACTION

### *Drawings*

1. New formal corrected drawings in compliance with 37 CFR 1.121(d) are required in this application. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1,3-4, 6,9-10 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al(6,163,510).

Regarding claim 1, 10 and 12, Lee discloses a video replay apparatus (Fig. 1) comprising:

a content storage device (11) ;

a replay controller (18) configured to control a replay of video material from said content storage device , said replay controller being configured to control the replay in accordance with metadata associated with said video material, the metadata\_data-defining an information content of said video material and defining an information event within said video material as a threshold change (sound level change, time code) the information content (column 2,lines 46-68, columns 3-4) ; Lee further teaches said replay controller is further configured to replay said video material with a pre-defined number of information events in a unit of time in a replayed sequence since the user can define a number of information event to replay since the user can control the apparatus for replaying the event information (Fig. 7).

Regarding claim 3, Lee further teaches comprising a user control, in which said replay controller is operable to vary a threshold information content to define an information event within said video material, in response to said user control (column 4).

Regarding claim 4, Lee further teaches the video replay apparatus further comprising a user control, in which said event pre-defined number is defined by said user control.(Fig. 7).

Regarding claim 6, Lee teaches the metadata defining said information content of said video material comprises data defining \_a presence of speech within audio material associated with said video material (column 4).

Regarding claim 9, Lee teaches the video replay apparatus according to claim 1, further comprising an information content analyzer configured to derive said metadata from said video material and/or associated audio material (column 4).

***Allowable Subject Matter***

4. Claims 5 and 7-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 2621

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T. NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John W. Miller can be reached on (571) 272-7353. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
